

# Portfolio of large-scale exploration projects covering >17,000 hectares in Peru

## Primary Projects

- Aguila/Pasacancha/Mamaniña Projects (100% interest) – Potential for a massive copper-molybdenum porphyry with excellent surrounding infrastructure
- Ichuña Project (100% interest) – Copper-silver porphyry with oxide copper mineralization and high grade silver at surface. Adjacent to the 7.6M oz gold equivalent Chucapaca project being developed by Gold Fields and Buenaventura

## Other Projects

- Corongo Project (50% interest) – Gold-silver epithermal system identified over 3 km strike length
- Minasnioc Project (100% interest) – High sulphidation epithermal gold project
- Panteria Project (100% interest) – Porphyry copper project with low-sulphidation epithermal gold showings
- Don Pancho Project (100% interest) – Silver-lead-zinc carbonate hosted replacement deposit located 10 km from Trevali Resources' Santander Mine
